PCI Compliance & Sustainability

Payment Card Assessments, LLC

WHAT IF YOU COULD MANAGE PCI COMPLIANCE WITHOUT THE STRESS & AGGRAVATION?

Would you do it?

PCI Compliance 365

Introducing PCI Compliance 365

PCI Compliance 365 is a knowledge base and workflow process built based on PCI DSS best practices and 20+ years of combined experience.

If you have a Project Management Work Flow tool like Jira, ServiceNow, or ClickUp, we can implement PCI Compliance 365 at a fraction of the cost of most GRC tools.

By combining your Project Management Workflow tool and PCI Compliance 365 you may save tens of thousands of $$ in outside assessment fees, shave months off your annual assessment, and finally get your head out of all those spreadsheets.

Built with PCI ISA's and Compliance Managers in mind, PCI Compliance 365 takes the guesswork out of PCI DSS Compliance.

Plan for your next PCI DSS Assessment

Whether this is your first assessment or your 17th, implementing a Project Management workflow tool w/ PCI Compliance 365 knowledge base and workflow processes is designed to help you plan, organize, and execute on a successful assessment.

Project Management Workflow Tools

- Collaborate in real-time using shared spaces
- Enable flexible ways of working for your team using customizable Boards.
- Organize and manage any type of work such as personal work tasks, team tasks, or lists of other items from a central workspace.
- Manage all required documentation directly within a Space by creating rich-text docs that enable real-time collaboration.

PCI Compliance 365

- PCI DSS Knowledge Base
  An integrated knowledge base that provides all the pertinent data and information housed in a centralized, accessible location, employees have more time to focus on actually accomplishing what they intended to in the first place.
- Automated Process Workflows
  - Automation does not tire or find a task tedious. It performs the task with the same level of efficiency and quality from the beginning of the day to the end.
  - Automation provides greater consistency and better standardization.
